Carahsoft Law Enforcement Technology Newsletter

The following newsletter summarizes notable news in the law enforcement industry, current events, and provides access to informative and educational events.

Featured Event

Accelerate 2019

Join us on April 29th – May 1st for Axon Accelerate, the leading technology conference for public safety professionals. This year, **former US Army General Stan McChrystal** will deliver the keynote speech and provide

attendees with invaluable insight into leadership strategies and the relentless drive to protect our communities. **Register today** to join Axon and Carahsoft in Phoenix, Arizona, and use discount code **AACarahsoft50** to receive $50 off your registration.

Axon just achieved a FedRAMP Joint Authorization Board (JAB) Provisional Authority To Operate (P-ATO) at the Moderate Impact Level. **Discover which Axon products are in-scope >>**

Resources

Minimizing Social Media Security Risk

Hootsuite's Global Strategist, Ben Cathers, advises some of the world's largest governments regarding their social media management infrastructure. Discover the practical steps government agencies can take to minimize social media security risk.

Check out the 3-Step Action Plan for Government >>
Listen to Ben Cather's podcast interview >>

Complete Deep-Dive Forensic Investigations Faster with Image and Facial Recognition

Investigations are complex. Learn how Access Data can help you accomplish your mission faster using the market's premier tools for investigation. With advanced image and facial recognition, APFS parsing and more, you can analyze all mobile, image, and computer data simultaneously, saving time and eliminating the need to pass evidence between applications. **Discover these features here >>**

Exceptional Digital Experiences and Workflows in Law Enforcement

The demands of law enforcement are made more complex and challenging by today's rapidly increasing digital asset requirements. Discover how Adobe Experience Manager (AEM) provides a more secure hub

Seattle Police Department (SPD) Crime Dashboard

SPD has switched their crime-reporting format based on their General Offense (GO) Reports. The SPD now receives their crime statistics faster because their GO data is updated on an on-going monthly basis and

that effectively handles a wide variety of crucial law enforcement functions allowing employees to focus on their main concern – enforcing the law. **Read this whitepaper >>**

replaces previous data to reflect classification changes, investigative updates, and reporting delays. GO crime incident data also mirrors the major crime categories that SPD uses to identify, respond, and assess effectiveness in addressing community crime problems. **Check out SPD's crime dashboard >>**

Responding from All Sides

When it comes to technology, Washington State Patrol (WSP) detectives are fearless. They regularly experiment with tools and software to find innovative ways to use technology. That technology versatility helps give them the comfort and confidence to respond to any incident and investigate it thoroughly. They needed a hefty dose for the massive 2017 DuPont train derailment outside Tacoma, Washington. The incident not only challenged WSP detectives, it provided the opportunity to push the limits of one of their newly developed forensic tools: an integrated scanning/UAV point cloud. **Check out the case study >>**

Police of Chiefs Talk Priorities: Collaboration and Advanced Technologies

Many of the pressing issues facing law enforcement today were discussed at the Major Cities Chiefs Association conference. This event shed light on four key areas that chiefs of police see as top priorities including collaboration between federal and local authorities, applying advanced technology to solving crimes, preventing gun violence against officers, and bridging the generation gap. Discover how chiefs of police are overcoming many diverse challenges. **Check out the blog >>**

How BlackBerry 2FA and BlackBerry UEM Help Suffolk County Police Department (SCPD) to Protect and Serve New York

Since rolling out BlackBerry 2FA and BlackBerry UEM, the SCPD has lowered its security costs and gained greater control over its mobile fleet. Discover the new processes that allow officers to take the field much quicker, and operate with much greater efficiency. Rolling this out also put more emphasis on maintaining critical systems, securing sensitive data, and seeking new and innovative ways to empower and enable their organization. **Learn more >>**

Secure Law Enforcement Networks

Law enforcement agencies are adopting new digital technologies to combat crime trends, increase public safety, and reduce operating costs. Discover how several police service organizations around the world have used the capabilities of the Palo Alto Networks Security Operating Platform to simplify operations, reduce cost of ownership, increase security resilience and performance and ease skill shortages. **Check out the case study >>**

Highlight Video

Veritone IDentify Application

Veritone's suspect identification solution, IDentify, automatically compares video and photographic evidence with your known-offender and person-of-interest records enabling you to identify potential suspects quickly for further investigation. To learn more about how IDentify can help you tap into your arrest records to accelerate your investigations, **watch this video** or **contact us** to request a demo.
